## Mercedes-Benz Special Trucks produira plus de 1 500 camions pour l'armée canadienne

**Ottawa, Canada/ Leinfelden-Echterdingen** – Mercedes-Benz Special Trucks produira plus de 1 500 Zetros dans le cadre d'une commande du ministère canadien de la Défense nationale. Les forces armées canadiennes prévoient d'utiliser ces véhicules pour le transport tout-terrain de marchandises et de personnel. Mercedes-Benz Special Trucks, Marshall Canada, l'entreprise française Soframe, Manac et General Dynamics Land Systems-Canada (GDLS-Canada) forment le consortium "The Power Team". Ces cinq entreprises collaborent à la mise en œuvre de la commande pour la modernisation de la flotte logistique canadienne dans le cadre du projet "Logistics Vehicle Modernization" (LVM).

Franziska Cusumano, Responsable de Mercedes-Benz Special Trucks, a déclaré : "Nous sommes ravis de travailler avec nos quatre solides partenaires pour équiper la flotte logistique canadienne. Ce contrat témoigne de la confiance que l'un des plus grands pays de l'OTAN accorde à notre réseau de partenaires, à notre expérience, à notre fiabilité et à nos compétences techniques. Ensemble, nous fournirons les bons produits et assurerons le meilleur soutien possible en service pendant de nombreuses années".

Les camions de la gamme Zetros serviront de châssis commun et seront produits dans l'usine Mercedes de Wörth-am-Rhein. Marshall Canada produira une gamme de modules de mission interchangeables de 10 et 20 pieds pouvant être montés sur ces Zetros. Manac fournira différentes remorques, tandis que le français Soframe est chargé du blindage des véhicules. General Dynamics Land Systems-Canada (GDLS-Canada) sera l'intégrateur principal de ce projet d'acquisition du ministère canadien de la Défense nationale. Au total, le Canada recevra plus de 1.000 Zetros légers (véhicules à deux essieux avec traction intégrale, 4x4) et environ 500 Zetros lourds (véhicules à quatre essieux avec traction intégrale, 8x8).

L'un des véhicules destinés au ministère canadien de la défense nationale, le nouveau Zetros 8x8 à quatre essieux et à transmission intégrale, est actuellement visible au salon Eurosatory, qui se tient à Paris jusqu'au 21 juin.

**Forward-looking statements:**

This document contains forward-looking statements that reflect our current views about future events. The words "aim", "ambition", "anticipate", "assume", "believe", "estimate", "expect", "intend", "may", "can", "could", "plan", "project", "should" and similar expressions are used to identify forward-looking statements. These statements are subject to many risks and uncertainties, including an adverse development of global economic conditions, in particular a decline of demand in our most important markets; a deterioration of our refinancing possibilities on the credit and financial markets; events of force majeure including natural disasters, pandemics, acts of terrorism, political unrest, armed conflicts, industrial accidents and their effects on our sales, purchasing, production or financial services activities; changes in currency exchange rates, customs and foreign trade provisions; a shift in consumer preferences; a possible lack of acceptance of our products or services which limits our ability to achieve prices and adequately utilise our production capacities; price increases for fuel or raw materials; disruption of production due to shortages of materials, labour strikes or supplier insolvencies; a decline in resale prices of used vehicles; the effective implementation of cost-reduction and efficiency-optimisation measures; the business outlook for companies in which we hold a significant equity interest; the successful implementation of strategic cooperations and joint ventures; changes in laws, regulations and government policies, particularly those relating to vehicle emissions, fuel economy and safety; the resolution of pending government investigations or of investigations requested by governments and the conclusion of pending or threatened future legal proceedings; and other risks and uncertainties, some of which are described under the heading "Risk and Opportunity Report" in the current / in this Annual Report or in the current Interim Report. If any of these risks and uncertainties materializes, or if the assumptions underlying any of our forward-looking statements prove to be incorrect, the actual results may be materially different from those we express or imply by such statements. We do not intend or assume any obligation to update these forward-looking statements since they are based solely on the circumstances at the date of publication.

**Daimler Truck at a glance**

Daimler Truck Holding AG ("Daimler Truck") is one of the world's largest commercial vehicle manufacturers, with over 40 main locations and more than 100,000 employees around the globe. The founders of Daimler Truck have invented the modern transportation industry with their trucks and buses a good 125 years ago. Unchanged to this day, the company's aspirations are dedicated to one purpose: Daimler Truck works for all who keep the world moving. Its customers enable people to be mobile and get goods to their destinations reliably, on time, and safely. Daimler Truck provides the technologies, products, and services for them to do so. This also applies to the transformation to CO2-neutral driving. The company is striving to make sustainable transport a success, with profound technological knowledge and a clear view of its customers' needs. Daimler Truck's business activities are structured in five reporting segments: Trucks North America (TN) with the truck brands Freightliner and Western Star and the school bus brand Thomas Built Buses. Trucks Asia (TA) with the FUSO, BharatBenz and RIZON commercial vehicle brands. Mercedes-Benz (MB) with the truck brand of the same name. Daimler Buses (DB) with the Mercedes-Benz and Setra bus and coach brands. Daimler Truck's new Financial Services business (DTFS) constitutes the fifth segment, the product range in the truck segments includes light, medium and heavy trucks for long-distance, distribution and construction traffic and special-purpose vehicles used mainly in the municipal and vocational sector. The product range of the bus and coach segment includes city buses, school buses and intercity buses, coaches and bus chassis. In addition to the sale of new and used commercial vehicles, the company also offers aftersales services and connectivity solutions.
