

339 new part numbers from Metalcaucho for the summer

Launching July 2020

17 new link bars

47 new engine and gearbox mounts

35 new wheel hubs

339 NEW PART NUMBERS

Metalcaucho presents a launching focused in rubber and metal with 37 exclusive parts, and continues betting on the Asian vehicle with new links bars, and expands the range of wheel hubs with 35 new parts numbers

July 22, 2020 - [Metalcaucho](https://www.metalcaucho.com), european leading supplier of aftermarket spare parts in rubber and metal for the automotive sector, doesn't stop presenting novelties to the market. **The catalog continues growing** and this July there are more than 300 new part numbers that they make available to their clients. On this occasion, the engine and gear mounts, hoses, boots and silentblocks take center stage.

Two families of product deserve a special mention, such as the hubs, which grow by 35 more part numbers, and the link bars, which with 17 new features continue to complement the offer for the Asian car park. In addition, as usual, they present **exclusive part numbers**. In this July launching there are 37 that you can only find on Metalcaucho.

[The pdf with all the news, that you can download from its web](#), is a practical work tool for professionals in the sector, and it also comes with an improvement. If you click on the code, Metalcaucho online store page will open, where you can see the **complete information about the item and availability on the stock**. We try to make your job easier.
