CARMUNICATION: Autodistribution International (ADI) becomes a full member

CARMUNICATION is known as the non-profit association that delivers Auto Live Data. Endorsing its commitment to supplying spare parts for connected cars, Autodistribution International (ADI) has now decided to become a full member of CARMUNICATION.

Wien/La Hulpe, 26 April 2018. – The era of connected cars comes with new challenges for businesses in the automotive aftermarket. As a distributor of a full range of auto parts, Autodistribution International (ADI) is aware of the importance of access to vehicle data when it comes to repairing and servicing connected cars. Developing a platform for Auto Live Data, CARMUNICATION provides fair access to vehicle data required in these activities. Joining their efforts, ADI has now become a full member of CARMUNICATION, which was announced by Thomas Vollmar, president of ADI, at the occasion of the *ADI Summit* in La Hulpe (Belgium) yesterday.

Operating from its headquarters in Kortenberg, Belgium, ADI provides services in 40 countries, supporting its 25 partners who supply professional repairers a full range of parts, products, tools and equipment. In addition, ADI and partners offer a comprehensive services portfolio, including technical support that assists repairers who want to be prepared for the technical evolution in motor vehicles.

CARMUNICATION and ADI look forward to meeting the challenges in the connected automotive aftermarket together.

About CARMUNICATION:

Non-profit association CARMUNICATION collects relevant vehicle data and makes them available to members on the CARMUNICATION platform. These data show e.g.: Are there any problems with the vehicle? What is the handling performance like? When is the next service due?

Who benefits from CARMUNICATION? Auto Live Data are crucial for analysis and diagnosis, especially when problems arise, repairs need to be made, or if one needs to estimate the value of a vehicle. This is why the following parties have a legitimate interest in Auto Live Data: insurance companies and vehicle fleet operators, breakdown services, IT services, brand-name workshops, spare part manufacturers, vehicle manufacturers, diagnostic providers, but also public institutions.

CARMUNICATION helps them to secure their access to Auto Live Data. For more information, go to <http://carmunication.eu/auto-live-data-what-for>
