The results approved today by the Board of Directors recorded revenues exceeding €3.8 billion, with improving margins and, for the first time, net profit at over €300 million. Each of these indicators grew compared to the already significant 2022 figures. In absolute terms, these are the highest results ever in Brembo's history. We reported an excellent cash generation, further reducing our debt. Investments amounted to an unprecedented level of over €430 million. We have entered the new year announcing the opening of our first production site in Thailand, aimed at seizing growth opportunities in the Southeast Asia region. At the same time, the Company is forging ahead with its digital evolution through the development of the Sensify intelligent braking system and the start of operations of Brembo Solutions, launched in 2023 to provide companies with AI solutions. Our ambition remains to be the leader in our industry and support our customers in the process of deep transformation of the automotive world."

Brembo to expand its industrial presence in Thailand

As announced on 22 February 2024, Brembo will expand its global industrial presence by opening its first production site in Thailand dedicated to the motorbike market. The planned investment amounts to approximately €40 million and reflects the Group's strategy to strengthen its position in the two-wheeler segment and seize new growth opportunities in the Southeast Asian region.

The new site will manufacture braking systems for motorbike manufacturers in Thailand, starting with European and American producers. It will be built within the country's motorbike industrial hub, located in the Rayong province, south of Bangkok. Once fully operational, in the first quarter of 2025, the site will employ around 150 people and will manufacture approximately 700 thousand brake discs a year.

This project follows Brembo's investments in the motorbike market in recent years, including the acquisitions of SBS Friction in Denmark and J.Juan in Spain between 2020 and 2021. These acquisitions have enabled the Group to enhance its product offerings dedicated to two-wheelers.

Foreseeable Evolution

Based on the order book and barring significant changes in the current macro-economic and geopolitical context, Brembo expects an increase in revenues in the mid-single digit range for the current year compared to the previous year.

Approval of the Consolidated Disclosure of Non-Financial Information for 2023

Brembo's Board of Directors examined and approved the Consolidated Disclosure of Non-Financial Information for 2023 pursuant to Legislative Decree No. 254/2016.

Brembo updated its materiality analysis — the tool used to identify its material sustainability topics — and therefore aligned the content of its Disclosure of Non-Financial Information, instrumental to providing an overview of the Group's operations, performance, results and future strategies and targets.

Brembo applied in advance the requirements of EU Directive No. 2022/2464 on a voluntary basis by launching the double materiality process, namely integrating the impact assessment based on GRI Universal Standards 2021 with the risks and opportunities that may influence the Group's value creation, strategy, operating and financial performance and positioning in the short, medium and long term.

The Disclosure will be made available to the public on the Group's website within the terms established by applicable laws and will be submitted to the forthcoming General Shareholders' Meeting.
