

## Alfa e-Parts is presented in Frankfurt with the ISO 9001 certification

The new BBB Europe brand of electrical and electronic components confirms the quality of its products before the appointment at Automechanika

**September 5, 2022** - [Alfa e-Parts](#), new brand of electrical and electronic components for the automotive industry, and which is part [BBB Industries](#), leading American company in the remanufacturing industry, arrives at a key event such as the [Automechanika fair in Frankfurt \(Hall 6.1 Stand B21\)](#) with the **ISO 9001:2015 certificate** achieved.

After presenting to the sector at the [Motortec fair in Madrid](#), and calling the attention of the public at the [Autopromotec fair in Bologna](#), Alfa e-Parts wants to confirm its commitment at the Automechanika fair in Frankfurt, the most important event in the sector in Europe, where it will arrive full of arguments for its success. And one of them is undoubtedly the excellence of its products

The cornerstone of this project has been obtaining the [ISO 9001 certification in its 2015 version](#) for its **Quality Management System**, after overcoming the audit carried out by the BSI Certification Entity. In this way, this accreditation **endorses the continuous improvement and high quality of our processes and products**, the maintenance and supervision of its equipment and materials to guarantee an excellent state of conservation and operation, the exhaustive monitoring of each of our processes and the rigorous controls to which all products are subjected.

[Alfa e-Parts has launched almost 5,000 part numbers to the market.](#) They are committed to a **product 100% designed, manufactured and tested** under rigorous and demanding [quality](#) tests, a **wide range** that will not stop growing (about 6,000 new part numbers annually), and a **service** that meets the expectations of his customers (taking advantage of the logistics of the BBB Industries group brands).

Alfa e-Parts, which will be presented in Frankfurt by **BBB Europe**, the European subsidiary of the American BBB Industries, sharing space in Hall 6.1 with other group brands (Metalcaucho, STC, Cautex and RedLine). In addition to its wide range, the new player in the aftermarket will present the [Alfa HT1 Valve Tester](#) at its stand, an innovative tool that it makes available to its customers to diagnose the operation of EGR and throttle valves, and thus avoid incorrect warranties. It's a **technical solution designed and developed by the brand itself, completely new and unparalleled in the sector (it is patented).**

#### **About Alfa e-Parts**

Alfa e-Parts is a new brand of BBB Industries, a leading American company in the remanufacturing industry, which focuses on the development and commercialization of electrical and electronic spare parts for the automotive sector at a global level. We have three clear highlights: quality, range and service.
