

## GAC launches electric hatchback AION UT in Finland, Greece, Poland and Portugal

- A multi-market debut: In May, GAC expanded its European footprint with the launch of AION UT in Finland, Greece, Poland and Portugal.
- European DNA: Designed at GAC's Milan Design Centre and manufactured at Magna in Austria, AION UT is a hatchback EV purpose-built for the European city.
- Peace of mind: Delivers up to 430 km (WLTP) of range, fast charging from 30–80% in just 24 minutes, and backed by an 8-year manufacturer warranty.
- Segment-leading space: With a 2,750 mm wheelbase and 4,270 mm in length, AION UT's interior experience is comparable to larger vehicles.

**Amsterdam, the Netherlands, 1 June 2026** – GAC's first compact electric vehicle specifically designed for urban mobility, the AION UT, debuted in Finland, Greece, Poland and Portugal in May. The arrival of AION UT signals GAC's push into the European electric vehicle landscape. Designed in Milan and manufactured at Magna in Austria, AION UT is a vehicle with European DNA.

### Strategic European alliances

GAC has forged strategic alliances with some of the industry's most formidable automotive distributors. In Poland, the brand's rollout is driven by Jameel Motors, backed by the global mobility powerhouse Abdul Latif Jameel, leveraging extensive international operations expertise.

Simultaneously, GAC has partnered with Inchcape in Finland and Greece, tapping into a globally renowned network with decades of premium retail expertise. In Portugal, AION UT is distributed by Grupo JAP, an automotive giant with over a century of heritage and a nationwide retail presence.

By securing these heavyweight partners, GAC guarantees that AION UT drivers benefit from a robust dealership network and aftersales support. More European markets will follow in the next months.

### **Interior space**

AION UT was engineered as the ultimate response to fast-paced urban environments. Its compact silhouette makes navigating narrow European streets and tight parking spaces easy. AION UT's overall length is 4,270 mm and with a class-leading wheelbase of 2,750 mm it provides a cabin space that rivals much larger vehicles. Everyday practicality is maximized through a generous 440-liter luggage compartment and 24 storage spaces distributed throughout the cabin.

### **Range and warranty**

Powering this new expression of urban comfort is a 150kW (204 hp) electric motor paired with a 60 kWh LFP battery, delivering a WLTP combined range of up to 430 km. AION UT can charge from 30% to 80% in 24 minutes.

To ensure total peace of mind for European consumers, AION UT is backed by 8-year manufacturer warranty on the car and the battery, serving as a testament to the vehicle's build quality and reliability.

### **Intelligent technology and safety**

The cabin is designed around modern ergonomics and daily functionality. At its core is a 14.6-inch multimedia display that offers intuitive access to the vehicle's systems, including full Apple CarPlay® and Android Auto™ integration. Passenger well-being is prioritized with an advanced PM2.5 air filtration system and heat pump technology, ensuring cabin comfort regardless of external conditions.

Crucially, AION UT features a full suite of advanced driver assistance systems (ADAS) designed to elevate both safety and driving confidence. Standard features include adaptive cruise control with integrated driving assistance, automatic emergency braking, forward collision warning, lane-keeping assist, and lane departure prevention. Drivers are further supported by a 360° panoramic camera, parking sensors, and Blind Spot Detection (BSD) with a door-opening warning system.

## **About GAC**

Founded in 1997 and headquartered in Guangzhou, GAC Group has been listed in the Fortune Global 500 for 13 consecutive years. With comprehensive R&D and manufacturing capabilities, and brands including GAC, AION and HYPTEC, GAC Group is dedicated to intelligent, high-quality, and sustainable mobility.
