

PRESS ANNOUNCEMENT

VVDN Acquires GGS Engineering, Expanding its ER&D Portfolio in Automotive, MedTech and Aerospace industries

18th August 2025, Gurugram: VVDN Technologies, a global provider of software, product engineering and electronics manufacturing services & solutions, today announced the acquisition of GGS Engineering Services, a leading engineering solutions company specializing in offering enhanced ER&D services for the Automotive, MedTech and Aerospace.

With this acquisition, VVDN has on-boarded engineers with two decades of experience in Mechanical Design, Analysis, Simulation, Virtual Manufacturing and Technical Publications. The key benefits of this acquisition for OEMs include:

- Innovative Product Development with Accelerated Time-to-Market.
- Value Added Engineering for Cost Optimization.
- Scalable Engineering Talent Solutions.

The integration of GGS Engineering's mechanical and electrical expertise with VVDN's embedded systems and manufacturing prowess, creates a unique vertically integrated solution for OEMs across key industries such as:

- **Automotive:** GGS enables OEMs to create innovative designs that meet modern consumer expectations. VVDN now will be addressing the sector's rapidly evolving needs for cabin designs, vehicle electrification, NVH (Noise, Vibration, Harshness) refinement, and cutting-edge styling and wire harness.
- **MedTech:** VVDN will be serving MedTech customers with added portfolio by supporting them in the development of customized, precise, and efficient medical devices, implants, and surgical tools
- **Aerospace:** Combined with GGS experience in CAD/CAM skillset, VVDN will be able to support OEMs and Tier 1's to design and manufacture complex aircraft components with precision and efficiency.

Together, VVDN & GGS set the stage for smarter machines, faster development, and stronger competitive advantages across industries. The combined entity will operate under the VVDN umbrella, with GGS's leadership and founding teams continuing to play a pivotal role in the business.

Puneet Agarwal, CEO - VVDN Technologies: *"We are delighted to welcome GGS Engineering Services into the VVDN family. Their proven excellence in mechanical engineering and design significantly enhances our value proposition to global clients. Our strengthened expertise now allows us to deliver comprehensive, cost-optimized product development for the automotive, medical, and aerospace industries—positioning VVDN to expand its footprint in automotive ER&D space. We look forward to working together to deliver accelerated innovation and end-to-end engineering leadership."*

This acquisition is a crucial step in VVDN's growth strategy, enabling the company to aggressively penetrate the multi-billion-dollar global ER&D market and unlock new revenue opportunities across high-growth verticals.

About VVDN:

Founded in 2007, VVDN is a technology innovation company focusing primarily on Software Services, Product Engineering and Manufacturing Services. VVDN's India HQ is located at Gurgaon, India, and its North America HQ is located in Fremont, CA, USA. VVDN has a presence across the world with offices in US, Canada, Europe, Vietnam, South Korea, and Japan. With 11 advanced R&D Centres, VVDN is fully equipped to design, develop & test the complete hardware, mechanical & software required for a complete product or solution. VVDN's 7 Manufacturing facilities are located at Manesar, Gurgaon, and Pollachi, Tamil Nadu, India, which includes in-house best-in-class SMT Factory, Mold & Tooling Factory, Injection Molding, Die Casting, Powder Coating, Sheet Metal, Product Assembly Factory, and Product Certifications labs. Company offers a comprehensive suite of services from Hardware to Mechanical, Embedded Software to Cloud & Apps, Testing & Validation to Automation as well as Mass Manufacturing to its global customers.
