# PARTICIPATE IN FEAL 2018, THE MEETING OF THE FUTURE AUTOMOTIVE INDUSTRY!

- ▶ ELECTRIFICATION
- ▶ AUTONOMOUS AND INTUITIVE CARS,
- ▶ NEW USES AND MOBILITIES,
- ▶ GEOPOLITICAL CONFIGURATION...

Our global companies are witnessing the **emergence of different tendencies** and, with them, it is necessary to reinvent a whole industry - addressing **new technological challenges** and creating **new partnership schemes** in an ecosystem that is more and more digitized.

By placing **innovation at the centre of its agenda** and by selecting high-profile speakers, who witnessed the current and upcoming events, FEAL2018 aims to become a **reference** in the field of European events linked to the **industry of the future**.

By promoting meetings in a state of mind that remains true to **the values of the automotive industry**, FEAL2018 is the place to go - and it involves the entire industry: **manufacturers, suppliers, startups, clusters, institutions, associations, research laboratories, academics, consultants...**

Face à un monde de plus en plus connecté et urbanisé, l'industrie automobile est engagée dans une profonde mutation de son rôle et de sa relation avec le consommateur et l'utilisateur final.

Electrification, véhicules plus autonomes et intuitifs, évolution des usages et de la mobilité...nos sociétés mondiales voient émerger de nouvelles tendances et avec elles, c'est toute une filière qui doit se réinventer en relevant de nouveaux défis technologiques et en créant de nouvelles logiques partenariales dans un écosystème plus que jamais digitalisé.

En mettant l'innovation au cœur de sa programmation et en sélectionnant des intervenants de haut niveau, grands témoins des mutations en cours et à venir, le FEAL2018 a l'ambition de devenir une référence en matière d'événements européens liés à l'industrie de demain.

En favorisant les rencontres dans un état d'esprit fidèle aux valeurs de l'industrie automobile, le FEAL2018 est le rendez-vous à ne pas manquer de toute une filière : constructeurs, équipementiers, start-ups, clusters, institutions, associations, laboratoires de recherche, universitaires, cabinets de consulting...
