## **Free2move ajoute 150 Jeep® Renegade et Compass 4xe à son Hub de Mobilité de Madrid**

Free2move, leader en solutions de mobilité, révolutionne une fois de plus la mobilité dans la ville de Madrid avec l'arrivée de 150 véhicules Jeep® hybrides rechargeables ([Renegade Trailhawk](#) et [Compass Limited](#)) à la flotte qui compose son Hub de Mobilité. Free2move complète ainsi sa flotte dont le nombre de véhicule s'élève désormais à 700 dans la ville espagnole. Les véhicules de la marque Jeep offriront de nouvelles options de déplacement dans ou en dehors de la ville et seront disponibles à la location à la minute, à l'heure, à la journée et même au mois.

Free2move has the objective to simplify the mobility of its users by the ongoing adaptation of the App and services to their needs. To do so, Free2move has designed an innovative mobility service model, called the Mobility HUB. This solution allows customers to take a car for a few minutes or a few hours, and if they wish to keep the same vehicle for longer, they can without changing the contract – Free2move pricing will adjust automatically.

**With the addition of the Plug-in Hybrid Jeep SUVs in Madrid**, Free2move opens a new type of trips to their customers, allowing longer journeys in terms of both mileage and duration, but also in the countryside or even around Spain thanks to these multipurpose Jeep vehicles and the possibility to choose between driving in hybrid, electric or e-save mode.

As always, the cars can be easily found in the street nearby, inside the service area, that includes the centre of Madrid, as well as Las Tablas, Sanchinarro, Hortaleza, Moratalaz, Montecarmelo, Ventas, Pueblo Nuevo and Alcobendas. Maintenance, assistance and

insurance are included in all modes, and the carsharing service also includes energy and fuel. Also, the customer has 20 minutes for free to get to the booked vehicle.

Free2move reaffirms its commitment to creating sustainable mobility solutions. With the integration of these new plug-in hybrid models, to the 100% sustainable fleet of the Peugeot e-208 and Citroën Ami, the brand continues its firm commitment to reducing pollutant gas emissions. Thanks to its 'Zero' label, users of the platform will be able to park free of charge in the SER zone.

Free2move Mobility Hub allows the driver to choose automatically how long he/she wants to keep the car. With the help of the feature *Car Assist*, the app selects the right service according to the customer's needs: up to 28 days with the Carsharing and Rent solution and up to 24 months with Free2move subscription service.

### **The Jeep brand: a wider range of possibilities with Free2move**

Free2move users will now have access to, all through a single app, the unique combination of legendary 4x4 capability, authentic Jeep design and electrified powertrains that the Jeep 4xe portfolio has to offer.

In addition to the Madrid fleet, Free2move customers have access through the APP, to more than 450,000 vehicles in more than 170 countries for daily rental and monthly subscription, thus meeting the mobility needs of all users, depending on the time and situation.

This reinforcement of the fleet with PHEV cars is aligned with the Stellantis Dare Forward 2030 strategic plan which aims to lower the company's carbon footprint by 50% by 2030 and proposes an extensive range of mobility services to even more customers.
