

FOR IMMEDIATE RELEASE:

Ampure Germany Names Dr. Carsten Suckrow

Managing Director and Head of Sales Europe

MUNICH – (January 14, 2025) – Ampure German Holding GmbH, a pioneer in electric vehicle (EV) charging technology with an industry-leading lineup of high-quality charging solutions, has officially named Dr. Carsten Suckrow as its managing director and head of sales in Europe. Suckrow will oversee and provide expertise to its pioneering EV Solutions business of stationery and portable charging for electric vehicle applications, a primary focus for the organization. He will report directly to John Thomas, chief revenue and marketing officer at Ampure in the United States.

Suckrow brings more than 20 years of senior level management experience overseeing high performance teams with proven success in revenue generation, customer engagement, and channel partnerships across several verticals, including OEMS, vehicle fleets, CPOs, distributors, retailers, and energy organizations.

“We are pleased to have Carsten Suckrow join Ampure as the managing director and head of European sales with his strong knowledge of e-mobility and more than eight years of relevant experience in the electric vehicle charging and electrification spaces,” said Thomas. “Carsten’s mission will be to set the tone and strategy for our efforts throughout Europe by crafting a path for growth through collaboration with our channel partners in the automotive and OEM business and add value with resellers in the energy sector, charge point operators, fleet charging service providers, and utilities and distributors.”

“I am very excited to join the leading provider of innovative electric vehicle charging solutions, navigating diverse market dynamics and spearheading Ampure’s European growth,” said Suckrow.

Suckrow holds an MBA in Business Economics from The University of Göttingen and earned his Doctor of Business Administration and Management (PhD) from Bundeswehr University Munich. He lives in the greater Munich area with his wife and two sons.

Ampure is a leading provider of innovative electric vehicle and industrial charging solutions with a vision and commitment to shaping the future of mobility. Focused on innovation and automotive grade quality, Ampure products deliver unparalleled reliability, quality, safety, and customer satisfaction underpinned by in-house design, engineering, and manufacturing expertise. The company leads the acceleration of global sustainable transportation by offering cutting-edge charging solutions that improve reliability and digital solutions that can be easily monetized and controlled with confidence.
